

Hello,

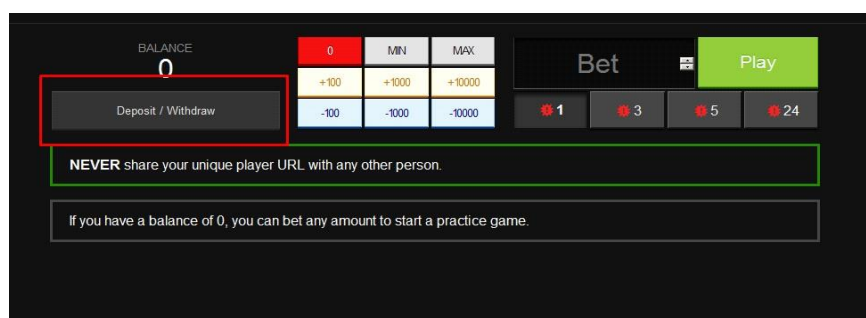

First of all, thanks for buying this e-book. So, this e-book contains my method, how I made good money from satoshimines with low risk.

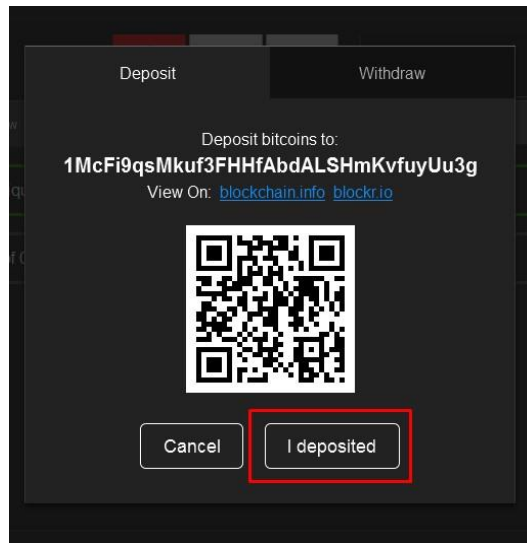

So let's start with it!

Step 1

So using your ref link you have to deposit the BTC to satoshimines. Click on deposit, and send the money to the BTC address mentioned there.

(I prefer to start with 0.01 BTC so that you can learn the strategy more easily) and click "I deposited".

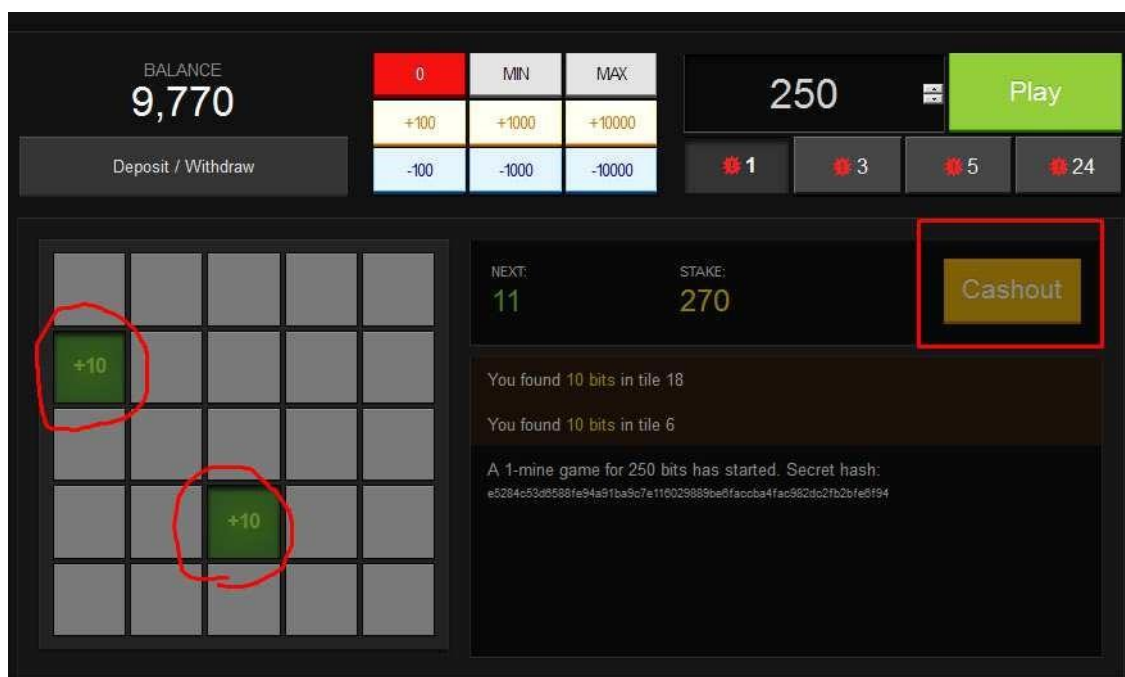

Step 2

So now you have to enter 250 in the bet amount and choose "ONE BOMB GAME" and click on play button.

Step 3

Now click on any two mines randomly and then click "CASHOUT" (**Not necessary to click the same ones I did**) and if you hit a bomb follow 4th step.

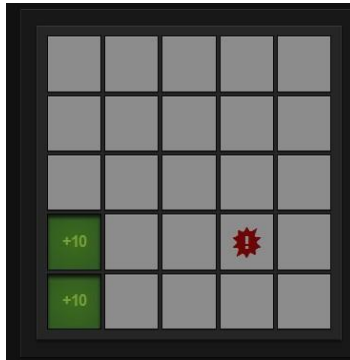

Now come to the tricky part, one thing I have discovered after 3 months is there is 85% chance that the place where the bomb was last time it won't be there **in the same row up or down**. I am **NOT** talking about the place I am **talking about the row**.

Didn't understood? Let me explain you using pictures.

This is the game I played. So in the next game we are going to click two mines either down/up or left/right where the bomb was last time (not the same place).

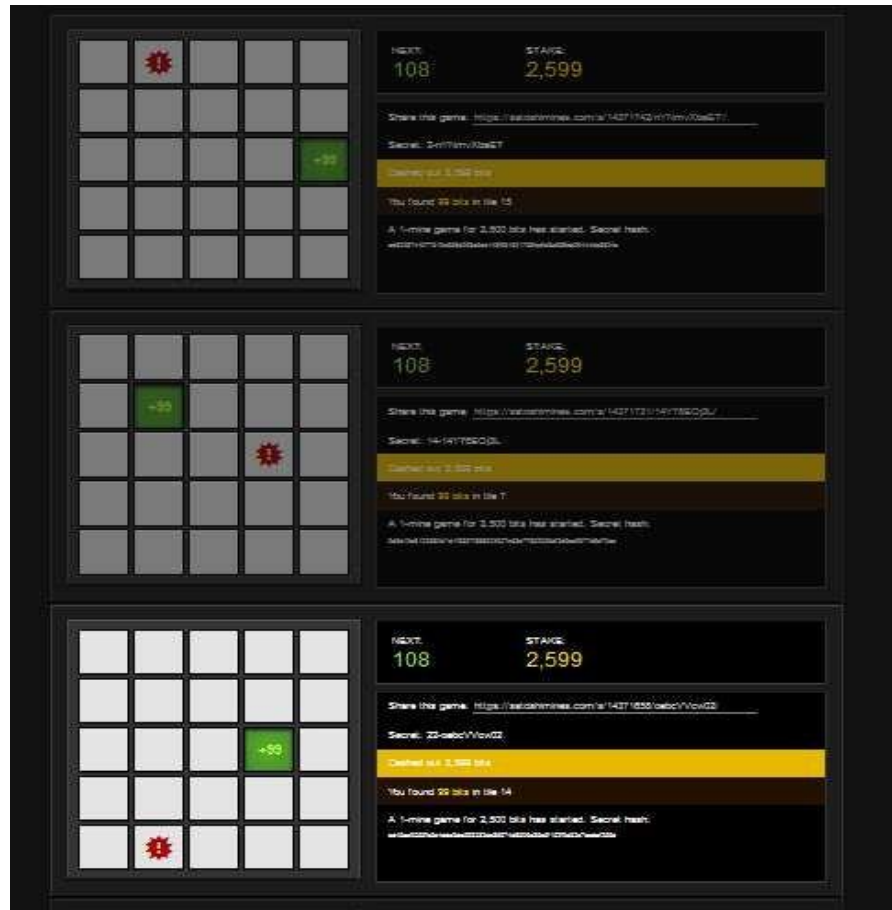

So did you see? In the next game the bomb was not in the same line (left, right, up or down)

So you have to continue playing until you hit a bomb. I am not saying that you have to always click in the same row, do it randomly some times because satoshimines is clever. And when you click a bomb by chance, follow the 5th step.

Step 4

So if you hit a bomb, all you have to do is increase the bet amount from 250 to 2500 like shown in the picture below. And then you have to play 3 games with same bet amount (2500)

And by chance if hit a bomb again when you are playing with 2500 bits (chances are really less) then you have to bet all the bits you have until you get your 2500 back.

And when you double your BTC just start playing with new URL!

And i was thinking to launch a bot which could automate this system and I hope I will release it really soon. So stay tuned ;)

DON'T BE GREEDY, I REPEAT DON'T BE GREEDY! I HAVE LOST A LOT BECAUSE I WAS IN A HURRY SO NEVER BE IN A HURRY !!
